Hewlett Packard Enterprise Strategic Partnership

The DXC Connect and Hewlett Packard Enterprise (HPE) Strategic Partnership provides Australian businesses with industry-leading technology that spans everything from the cloud to the data center to workplace applications. We help you take advantage of HPE's world-class portfolio to help combat disruption and enable transformation.

Engaging DXC Connect provides peace of mind that your infrastructure is optimised according to your business's changing needs and budget; meets your security and compliance requirements; and is managed to ensure your real-world operational needs are being met.

With a shared legacy and deep understanding of each other's cultures, working with DXC Connect and HPE means risks are minimised and your digital journey is accelerated. Solutions are affordable thanks to the flexible financing options from HPE Financial Services and there is the ability to scale support for organisations of all sizes.

DXC Connect's suite of HPE offerings and solutions include the following:

- **Applications, data and analytics solutions:** Next-generation services from DXC, paired with HPE solutions for storage, high-performance computing or converged systems for SAP HANA, Oracle, Microsoft Analytics or Big Data, drive deep insights and intelligent action to optimise performance and lower total cost of ownership (TCO) of data infrastructure.
- **Cloud and hybrid IT:** DXC's industry leading offerings such as Managed Services for Microsoft Azure & Azure Stack combine with next-generation platforms from HPE to securely form the best mix of traditional IT, private and public cloud that can scale up and down to meet changing business

needs. Together, this range of flexible and affordable infrastructure options, with solutions from HPE Financial Services, ensures that IT costs and services are continually aligned to the demands of the business.

- **Mobility and workplace solutions:** Campus and branch networking implementation or managed services from DXC align with the smart portfolio of solutions from HPE Aruba Networks that spans from access layer to the data center, enabling a "mobile first" strategy designed to securely and reliably accelerate mobility and internet of things (IoT) initiatives.
- **Wide Area Networks:** Well-designed and integrated enterprise networks are essential to maximise the potential of cloud services, virtualised infrastructure and enterprise mobility. Aruba's WAN provides an all-in-one solution that can rapidly deploy apps and security services wherever your staff may be.
- **Intelligent Edge and Internet of things:** DXC and HPE deliver on the new generation of digital experiences to transform businesses across manufacturing, energy and other industries.
- **Modern platforms with software-defined architectures:** DXC Infrastructure Services align with HPE hyperconverged solutions and composable infrastructure to simplify and optimise IT delivery and operations, creating value for enterprises of all sizes.

Today's companies are rethinking the way they work and many are embarking on a digital transformation journey to keep up with competitors and stay ahead of the curve. To help make this happen, it is important to partner with trusted organisations, like DXC Connect and HPE. Together, we spur on your digital experience and make it possible to thrive on change.
